EXPERIENCE

Vitality
Self-Employed

- Designed and created a fitness track web app
- Developed a dynamic user profile component using Firebase Authentication and Firestore to display personalized data such as fitness level, goals, and weekly progress.

ADOBLOQ
Self-Employed

- Developed a real-time inventory tracking system using Firebase and React, enabling live updates of product quantities across multiple branches.
- Implemented a dynamic dashboard with protected routes, responsive layout, and custom sidebar navigation for enhanced user experience.
- Designed and implemented a responsive, modern UI with Tailwind CSS, including custom theming and a sidebar navigation that adapts to active routes.

Happy-Hour
Self-Employed

- Developed a mobile-friendly drinking game app using React and JSON-based dynamic content, ensuring smooth and intuitive gameplay across devices.
- Implemented multiple game modes, including a timed challenge mode with a countdown feature to enhance engagement and fun during gameplay.

ConcretoCR
Self-Employed

- Lead Creator of a website for a local Business
- Design and developed the website using HTML, CSS, JavaScript focusing on usability and user Experience

SUMMARY

JR FRONTEND WEB DEVELOPER
Passionate about web development and technology, I am seeking to gain professional experience in front-end development. Throughout my studies, I have built several websites and collaborated with developers, which has helped me strengthen my technical skills and problem-solving abilities. I'm highly motivated to apply my knowledge in real-world projects, keep learning new technologies, and grow professionally as a developer.
